Course Syllabus

✎ **Edit**

Our class sessions may be audio-visually recorded for students in the class to refer back and for enrolled students who are unable to attend live. Students who participate with their camera engaged or utilize a profile image are agreeing to have their video or image recorded. If you are unwilling to consent to have your profile or video image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who un-mute during class and participate verbally are agreeing to have their voices recorded.

If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the "chat" feature, which allows students to type questions and comments live. The chat will not be recorded or shared.

As in all courses, unauthorized recording and unauthorized sharing of recorded materials is prohibited.

In order to get an A in this class, you will need to make a good presentation, and attend the presentations of others. You cannot miss more than two classes.

The textbook is Calculus Gems, by George F. Simmons, ISBN 978-0-88385-5614.

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the **Disability Resource Center (https://disability.ufl.edu/students/get-started/)** . It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

In this class, every student will be assigned some proofs from the textbook, and a date when the student will present those proofs to the class. These assignments will be made during the first class, that is, at 3 pm on Monday, January 11. It is therefore very important that you participate at that class.

The syllabus will be updated after the first class, once we know who will speak on each day.
