MAD 6407 Numerical Analysis (S23) Syllabus

General Information

Instructor: Dr. Chunmei Wang

Email: chunmei.wang@ufl.edu,

Office: LIT 302

Office hours: MWF 2:00pm-2:50pm or by appointment

(Scheduled) Class Time and Location

M W F Period 8 (03:00pm-03:50pm), LIT 0217

Required Texts

Numerical Analysis, W. Gautschi. Published by Springer. (You can download a pdf of the book or order a low-cost paperback if you search for the book through the UF library from online or VPN. Or, try this [link](#).)

Numerical Mathematics, A. Quarteroni, R. Sacco and F. Saleri. Published by Springer. (You can download a pdf of the book or order a low-cost paperback if you search for the book through the UF library from online or VPN. Or, try this [link](#).)

Recommended Text

Numerical Analysis, D. Kincaid and W. Cheney. Published by Brooks/Cole, any edition is fine.

Description and Goals

Description. (Credit hours: 3), Numerical techniques to solve systems of nonlinear equations, to approximate functions, to compute derivatives, to evaluate integrals, and to integrate systems of differential equations. Introduction to numerical techniques for partial differential equations. Companion to MAD 6406.

Topics.

Approximation and Interpolation
 Numerical differentiation and integration
 Numerical solution of nonlinear equations and systems
 Numerical solution of ODEs.

Goals. Understand the mathematical framework of basic numerical approximation techniques used in numerical analysis and scientific computing.

Prerequisites. MAA 4212, 5105, or 5229 (Analysis); and programming language.

Grading Policy

Grades will be calculated according to the following percentages ('+' and '-' may be assigned at upper and lower 2-point ranges of each grade):

Midterm Exam	15%	90%-100%	A
Homework	50%	80-89%	B
Final Exam	25%	70-79%	C
Attendance	10%	60-69%	D
		<60%	F
Total	100%		

Homework. Problem sets will be assigned bi-weekly. You are welcome to discuss problems with each other and/or with me, but the solutions you turn in must be your own. Any code turned in must be your own. You are discouraged from searching the internet for solutions. If you do refer to an outside source, you should cite that source. Wikipedia, blogs and tutorial websites are not valid sources.

Some problems will include writing basic matlab code. In some cases I may ask you to submit the code (by email) so that I may run it. Not all problems will be graded on all homeworks; homework grades will be assigned based on a combination of completeness (attempting all problems), and on your solutions to those explicitly graded.

Midterm Exam. This may be a take-home exam. The work is expected to be your own, and you will receive a zero on the entire exam if it is not. Exam dates will be posted.

Final Exam. There will be a comprehensive final exam designed as preparation for the qualifying exam. This may be a take-home exam. The work is expected to be your own, and you will receive a zero on the entire exam if it is not. Exam dates will be posted.

Class Policies

Symbolic Math. The focus of the class is on the basic computational algorithms in floating-point arithmetic used in scientific computation. Generally, you may not use the symbolic math toolbox (or use matlab commands including "sym", "syms," "symfun," "symsum," "symprod," etc.) on any homework or exam question. We may use it on occasion

for comparison.

Attendance. Class attendance is required.

Computers. There may be times a computer is necessary for the homework and take-home exams, as required. It is suggested that you program in Matlab or Python. C, C++, Fortran are acceptable, too.

Cell phones. Please don't use your cell phone during class. Phones and all electronic devices should be turned off during exams.

Make-up/late work. Make-up exam work is allowed only when written evidence of an official University excused absence is provided. Notification in writing (acknowledged email is acceptable) prior to the date of the absence is required. In cases where this is not feasible, the student must provide documentation by the end of the second working day after the absence. If these conditions are met, then the percentage grade earned on the final exam will be substituted for a missed exam.

Academic Integrity

Honor Code. UF students are bound by The Honor Pledge which states,

We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied:

“On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

The Honor Code specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. You can find the honor code here: <https://sccr.dso.ufl.edu/policies/student-honor-code-student-conduct-code/> If you have any questions or concerns, please consult with the instructor.

I take academic integrity very seriously. If a homework solution or take-home portion of an exam you turn in is not your own work as outlined above, you will receive a zero on that assignment. If multiple assignments are found not to be your own work, you will receive an F in the class.

SUGGESTION. Seek outside help on a problem only after thinking about it for at least 40 minutes.

Additional UF Policy Information

UF Policy on Grade Points. Grading will be in accord with the UF policy stated here: <https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

Class Attendance. Requirements for class attendance and make-up exams, assignments,

and other work in this course are consistent with university policies that can be found here: <https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>

Accommodations for Students with Disabilities. Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, <https://www.dso.ufl.edu/drc/>) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

U Matter We Care. Your well-being is important to the University of Florida. The U Matter, We Care initiative is committed to creating a culture of care on our campus by encouraging members of our community to look out for one another and to reach out for help if a member of our community is in need. If you or a friend is in distress, please contact umatter@ufl.edu so that the U Matter, We Care Team can reach out to the student in distress. A nighttime and weekend crisis counselor is available by phone at 352-392- 1575. The U Matter, We Care Team can help connect students to the many other helping resources available including, but not limited to, Victim Advocates, Housing staff, and the Counseling and Wellness Center. Please remember that asking for help is a sign of strength. In case of emergency, call 9-1-1.

Contact information for the Counseling and Wellness

Center. <https://counseling.ufl.edu/>, 392-1575; and the University Police Department: 392-1111 or 9-1-1 for emergencies.

Online Evaluations. Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at <https://gatorevals.aa.ufl.edu/students/> . Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via <https://ufl.bluera.com/ufl/> . Summaries of course evaluation results are available to students at <https://gatorevals.aa.ufl.edu/public-results/> .

Diversity, Equity and Inclusion Statement. The Mathematics Department is committed to diversity and inclusion of all students. We acknowledge, respect, and value the diverse nature, background and perspective of students and believe that it furthers academic achievements.

It is our intent to present materials and activities that are respectful of diversity: race, color, creed, gender, gender identity, sexual orientation, age, religious status, national origin, ethnicity, disability, socioeconomic status, and any other distinguishing qualities.

UF Policy on In-Class Recording: Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor.

A “class lecture” is an educational presentation intended to inform or teach enrolled students

about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session.

Publication without permission of the instructor is prohibited. To “publish” means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted by a person injured by the publication and/or discipline under UF Regulation 4.040 Student Honor Code and Student Conduct Code.

THIS SYLLABUS IS SUBJECT TO CHANGE.
