Text

'Book of Proof' by Richard Hammack (third edition)

A copy (courtesy of the author) may be downloaded [here](#)

Topics and Policies

Much of the 'Book of Proof' will be covered, largely following the order in the text. A significant aspect of the course is the attention to critical reading and writing skills; the course will certainly address a variety of mathematical topics, but the critical point of view is as important as the topics themselves.

Current circumstances have dictated that this course will be online. Lectures will be given via Zoom, with supporting material posted to Canvas. The Canvas page for this course will detail the manner in which the course is to be conducted and graded.

For other matters of policy, please see 'Policies plus' at the [Files](#) page.
