Advanced Calculus 1, Fall 2015

Advanced Calculus for Engineers and Physical Scientists 1,

Time, Location, and Section Number

MWF PERIOD 4, LITTLE 127, Sections 6153 of MAA 5104 and Section 3043 of MAA 4102

Office Hours (in Little 478).

Monday, Wednesday, and Friday 11:45AM – 12:10PM and 1:55PM – 2:20PM (first half of periods 5 and 7).

Description and Goals

The primary goal of the course is to obtain a sound understanding of the basic mathematical concepts of calculus. A secondary goal is to improve the ability to reason carefully and creatively when dealing with mathematical material.

We will cover the first four chapters of the text and the first section of chapter 5, as time permits. Topics include functions, sequences, limits, continuity and (possibly) differentiation.

Who should take this course

The fundamental ideas of calculus play an important role in the physical sciences and engineering. For this reason, students in these areas may choose to take this course, even though no particular applications are discussed in the course. Students in mathematics, education, and other areas may also choose to take this course. However, students who intend to pursue graduate study in mathematics should not take this course. These students should take MAA 4211 instead.
