

## Course Information

MAA 4402, Section 2838 Functions in one Complex  
Variable

MAA 5404, Section 16F1 Introduction to Complex  
Variables

**Location and Time of Classes:** 235 Little Hall, MWF 6th Period.

**Textbook:** Brown - Churchill, Complex Variables and Applications, ninth edition.

**Evaluation:** There will be six in-class tests, and a final exam. Each test will contribute 12 percent to the final grade, with the final exam making up the remaining 28 percent.

In this course, it is much more important to understand the concepts, then having the correct numerical answer. Solutions that do not show that the student understands the material will receive very low credit, even if they are numerically correct.

The grading scale is different for graduate and undergraduate students. If your name is on the MAA 5404 roster, that is, if you are earning graduate credit, then you need 80 percent for an A, 70 percent for a B, 60 percent for a C, and 50 percent for a D. Fractional grades are given following this linear pattern.

If your name is on the MAA 4402 roster, that is, if you are getting undergraduate credit, then you need 75 percent for an A, 65 percent for a B, 55 percent for a C, and 45 percent for a D. Fractional grades are given following this linear pattern.

**Tests.** They will be on January 25, February 8, February 22, March 15, March 29 and April 12.

**Final Exam.** On Monday, April 29, 10 am to 12 noon, in the regular classroom.

**Prerequisites.** MAC 2313 and MAP 2302.

**Instructor:** Miklós Bóna, 440 Little Hall, bona@ufl.edu. Office hours are, as of now, Wednesday 8th period, and Friday 7th period. This is subject to change.
