1. Introduction

1a. Course Content

College algebra, functions, coordinate geometry, exponential and logarithmic functions, and trigonometry. This **fast-paced course** is designed as a review of algebra and trigonometry to prepare the student for calculus.

A minimum grade of C (not C-) in MAC 1147 satisfies four hours of the general education requirement and also satisfies the pure math portion of the state Writing/Math requirement. Note: A student can receive at most four credits for taking both MAC 1147, and MAC 1140 or MAC 1114, and at most five credit hours for taking MAC 1147, MAC 1140, and MAC 1114. Students who successfully complete this course (C or better) can advance directly to MAC 2311, Calculus 1 (for engineers and scientists), or into MAC 2233, Survey of Calculus.

If your goal is to take MAC 2233, Survey of Calculus (for business majors), then you might want to talk to your advisor about taking MAC 1140, Precalculus Algebra, instead of this course (which includes trigonometry) since there is no trigonometry requirement for MAC 2233.

Students taking this course for general education credit or the pure math portion of the Writing/Math requirement, and who do not need precalculus for their major or as preparation for calculus, might consider taking MGF 1106 or MAC 1105. For more information on math courses and math advisors go to <http://www.math.ufl.edu/>.

1b. Prerequisites

This course assumes prior knowledge of intermediate algebra (Algebra 2) and trigonometry. Students should be able to do arithmetic without a calculator.

MAC 1147 begins with a short review of high school algebra topics (appendices A1 – A7). **You should already be competent in working this material.**

1c. Required Materials

- ◆ The textbook: **PRECALCULUS**, 9th edition, by Larson.
 - You may use either the e-book or a hard copy.
 - The solutions manual is NOT required.
- ◆ A valid WebAssign access code.
 - WebAssign provides a two-week grace period to use the online homework system before you must purchase an access code.
 - You should always use <https://www.webassign.net/ufl/login.html> to login to WebAssign (and then your Gatorlink login info as directed).

There are several purchase options:

- ◆ Purchase the textbook and WebAssign access codes together directly from the publisher at <http://www.cengagebrain.com/micro/1-1MSYIRB>.

- \$86 for the custom UF paperback book, access to the e-book, and a WebAssign access code; or
- \$50 for access to the e-book and a WebAssign access code.
- ◆ Purchase the textbook at a bookstore or elsewhere.
 - Either the UF custom 9th edition of the complete 9th edition may be used. If you purchase a new textbook, a WebAssign access code might (or might not) come with it, so please be aware.
 - Prices may vary.
- ◆ Purchase a WebAssign access code directly from WebAssign.

1d. Canvas

Canvas is located at <https://lss.at.ufl.edu/>; use your Gatorlink username and password to login. You can find your grades, announcements, lecture outlines, free help information, etc., at this site. You are responsible for verifying that your grades are accurate. You have one week after a score has been posted to contact your TA if you believe there has been a grading or a recording error.

1e. Lectures

Viewing lecture presentations is an important aspect of the learning process. The lecture provides the main presentation of the course material. Each lecture consists of several videos for a total of approximately 1 hour. Lecture outlines can be printed from Canvas. It is suggested that you read the book, watch the lecture, do the checkpoints as they come up in the lecture, do the corresponding book homework and the WebAssign Homework, and then take the WebAssign Quiz, in that order. The WebAssign Quizzes are generally due on Tuesdays (see the calendar), but you may take them earlier.

1f. Calculator Policy

A basic four-function calculator may be used on homework, quizzes, check-ups, and exams. A basic four-function calculator has ONLY the ability to add, subtract, multiply, and divide. It is not the same as a scientific or graphing calculator.

1g. Help

Your main resource person is your teaching assistant (TA) in the mathematics department. He or she is available during office hours (or by appointment) on campus, and by email (or arranged conference) to answer your questions about the course material. You may also contact the course coordinator, Mrs. Tornwall, during her office hours for help. **You should check Canvas regularly and consult with your TA if you have any questions about recorded grades. All grade concerns must be taken care of within one week of receiving the score.** Your grade is subject to being raised or lowered if there is a recording error, computational error, bubbling error, “padding” error, etc.

1h. Success

Success in MAC 1147 depends largely on your attitude and effort. Keeping up with the videos is critical. Most students find it beneficial to work daily on the material as opposed to saving it all for one day. It is not effective to sit and copy notes without following the thought processes involved in the lecture. For example, you should try to answer the questions posed by the lecturer. Students who actively participate have greater success.

Be aware that much of the learning of mathematics at the university level takes place outside of the classroom. You need to spend time reviewing the concepts of each lecture **before** you attempt homework problems. It is also important to spend some time looking over the textbook sections to be covered in the next lecture to become familiar with the vocabulary and main ideas beforehand so that you will be better able to grasp the material presented in the videos. **You should expect to spend at least 12 hours per week working on this course.**

1i. Students with Disabilities

Students requesting classroom accommodation must first register with the Disability Resource Center. The Dean of Students will provide documentation to the student who must then provide this documentation to the course coordinator, Mrs. Tornwall, when requesting accommodation.

1j. Academic Honesty

All students are required to abide by the Academic Honesty Guidelines which have been accepted by the University. The academic community of students and faculty at the University of Florida strives to develop, sustain and protect an environment of honesty, trust, and respect. Students are expected to pursue knowledge with integrity. Exhibiting honesty in academic pursuits and reporting violations of the Academic Honesty Guidelines will encourage others to act with integrity. Violations of the Academic Honesty Guidelines shall result in judicial action and a student being subject to the sanctions in paragraph XIV of the Student Code of Conduct. The conduct set forth hereinafter constitutes a violation of the Academic Honesty Guidelines (University of Florida Rule 6C1-4.017).

2. Testing

You must register with ProctorU for each exam at least 4 days prior to the exam date. It is highly recommended that you reserve your exam time slots for all of your exams early in the semester in order to guarantee you can take the exam at the most convenient time for you. You will have a 72-hour window in which to take your exam. See the course calendar for the dates of the exams.

Students are responsible for material covered in the lecture notes, including practice problems at the end of some lectures, all assigned book homework problems, and all assigned WebAssign material.

For each exam you should have only the following items: pencils or pens, your Gator1 picture ID card or a government-issued picture ID, a four-function calculator, and up to 10 sheets of completely blank, white, scratch paper (no holes, lines, printing, etc.). NO scientific or graphing calculators are allowed. NO CELL PHONES, NO NOTES, NO CALCULATOR MANUALS, NO BOOKS, NO OUTSIDE HELP!

The first three exams each consist of 15 questions and have a 90-minute time limit. The final exam consists of 18 questions and has a 2-hour time limit.

3. Grading

3a. Course Grade

The course is based on 500 points accumulated as follows:

Welcome Quiz (in Canvas)	2 points (0.4%)
Self-evaluation (in Canvas)	1 point (0.2%)
Lecture Checkpoints (in Canvas)	36 points (7.2%)
WebAssign Homeworks (36 @ 1 pt, max. of 30)	30 points (6%)
WebAssign Quizzes (best 12 of 15 @ 3 pts)	36 points (7.2%)
Checkups (in WebAssign; 3 @ 15 pts)	45 points (9%)
Midterm Exams (in WebAssign; 3 @ 80 pts)	240 points (48%)
Cumulative Final Exam (in WebAssign)	110 points (22%)

The course grade is determined by the number of points you have (not by the percentage), as shown below, and these cutoffs will be strictly enforced.

Grade	Points
A	450 – 500
A-	435 – 449.99
B+	420 – 434.99

3b. Welcome Quiz

The Welcome Quiz is to make sure you understand what is expected of you in this course. You will find this assignment on Canvas. It is due at the beginning of the semester.

3c. Self-evaluation

The Self-evaluation which is found in Canvas is after Exam 2. Its purpose is to let you know your approximate standing in the class. See the calendar for the due date.

3d. Lecture Checkpoints

At the end of each video is a Checkpoint problem that pertains to the concept recently covered. You should work the Checkpoint problem and write your answer down (a, b, c, d, or e), since you will need to enter your multiple-choice answer on Canvas. Checkpoint problems are due each Tuesday. It is best to do them as soon as possible.

3e. Textbook Homework

The textbook homework assignments represent the minimum number of problems you should do in each section. Some homework problems suggest the use of a graphing calculator; they are designed to help you visualize important concepts and to reinforce the mathematical processes involved. The use of a graphing calculator when doing homework is not required. The textbook homework will not be graded.

3f. WebAssign Homeworks and Quizzes

You must score a minimum of 70% on the WebAssign Homeworks before you can take the corresponding WebAssign Quiz. You have 10 attempts and unlimited time on each WebAssign Homework. You have three attempts and one hour on each WebAssign Quiz. The WebAssign Homeworks and Quizzes are generally due by 10:00 p.m. on Tuesdays. See the calendar for the specific due dates.

DO NOT wait until the last minute to take a quiz, since if you encounter a computer glitch or if WebAssign is down, YOU will be out of luck!

The best attempt for each WebAssign Quiz and Homework is the score that is counted. The WebAssign Homeworks and Quizzes are open-book and open-note. You may have a someone help you with the WebAssign Homeworks, but NOT with the Quizzes.

3g. Checkups

The Checkups (in WebAssign) are designed to give you feedback on your understanding of the course material prior to the corresponding midterm exam. They will be like a longer WebAssign Quiz. See the calendar for the due dates.

3h. Bonus Points

For each lecture, watching the lecture videos and then answering the bonus question found in Canvas can earn you bonus points. This must be done by 10 p.m. on the date suggested on the calendar for each lecture. The bonus question in Canvas will ask about the picture seen in the video.

3i. Make-up Policy

ALL WORK MUST BE COMPLETED BY DECEMBER 10 AT NOON (except for the Final Exam).

- ◆ Exams and Checkups: To be eligible for a make-up you must have received at least half of the Lecture Checkpoint points that have been given so far and have valid documentation.
- ◆ Homeworks or Quizzes: There are no make-ups, since there are three drops on the quizzes and at most 30 points (out of the 36 points available) count on the homeworks.

3j. Incomplete Grade

A grade of I (incomplete) will be considered only if you meet the Math Department criteria which are found at <http://www.math.ufl.edu/>. If you meet the criteria you must contact Mrs. Tornwall before finals week to be considered for an I. An I only allows you to make up your incomplete work, not redo your work.

4. Instructor Evaluations

Students are asked to provide feedback on the quality of instruction in this course based on ten criteria. These evaluations are conducted online at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results>.

5. Textbook Homework Assignments

You should read the textbook sections covered in each lecture before viewing the video. After each lecture, review your notes and the text to make sure you understand the main ideas prior to working the exercises.

If you have questions about the reading or homework exercises, you may ask your TA (or the course coordinator during office hours).

You should complete each assignment before the next lecture, since the material in each lecture often builds on previous concepts.
